Sunny Sahsi

Full Stack & Systems Engineer

India (Remote / Hybrid / On-site) • sahsisunny@gmail.com • +91 7759925544 • sunnysahsi.com • LinkedIn • GitHub

Full Stack & Systems Engineer at Fountane, working across Next.js and Go. I own features end to end, currently engineering a zero-trust AI agent orchestrator that resolves natural-language queries across 600+ microservice endpoints.

WORK EXPERIENCE

Fountane Inc.

Remote • Full-time — Aug 2024 – Present

Associate Full Stack Developer — 2026 – Present

- Architect and deliver full-stack features end to end across Next.js frontends and Go microservices, owning technical design and production delivery.
- Engineered an enterprise AI orchestrator in Go that translates natural-language queries into controlled API operations across 600+ microservice endpoints with strict caller-scoped RBAC.
- Hardened agent execution with session token validation, tenant scope injection in code (preventing prompt-based tenant drift), and automated auditing.
- Designed routine automation framework enabling scheduled, event-based, and conditional business workflows with explicit human approval flows.

Junior Full Stack Developer — Aug 2024 – 2026

- Developed responsive enterprise web applications using Next.js and Ant Design, optimizing rendering performance for large operational datasets.
- Built and maintained high-throughput Go backend services, enforcing data integrity, tenant isolation, and strict REST API contracts.
- Designed and shipped payment API integrations and transactional CRUD services with complete database consistency guarantees.
- Implemented dynamic role-based authorization layers in Next.js, securely gating views and API access according to user privilege levels.
- Wrote unit and integration test suites using Vitest and TypeScript to guarantee regression resilience across core workflows.
- Managed CI/CD release pipelines on GitLab and maintained agile sprint delivery tracking with Jira.
- Worked with MySQL and PostgreSQL databases.

Real Dev Squad

Remote • Open source — Dec 2022 – Nov 2024

Open Source Contributor — Dec 2022 – Present

- Worked across React, Next.js, Ember and Vue.js codebases.
- Built the Goal form modal using Vue.js and Vuetify.
- Added a feature to lock the accordion for unauthorized users.
- Added a filter to list users by status.
- Built a feature to show a user's pull requests on their profile page.

SmartInternz

Remote • Externship — Aug 2022 – Sep 2022

Android Developer (Externship) — Aug 2022 – Sep 2022

- Built Android apps with Kotlin.
- Applied Material Design: colour, spacing and typography.
- Created a 'Grocery App' project.

TECHNICAL SKILLS

Core Languages:
Go, TypeScript, JavaScript (ESNext), SQL*

Frontend Engineering:
Next.js, React, React Native (Expo SDK), React Query, Vite

Backend & Distributed Systems:
Go Microservices & REST*, Node.js / Express, Fastify, WebSocket Telemetry

Databases & Storage:
PostgreSQL*, MySQL*, Redis (Caching & Queues)*, MongoDB

AI Systems & Agents:
LLM Tool Orchestration, Model Context Protocol (MCP), Zero-Trust Agent Security Gates, RAG & Vector Embeddings

Workflow & Developer Tooling:
Claude, Cursor, Antigravity, Git & GitLab, Jira

EDUCATION

Bachelor of Computer Applications (B.C.A)

Patna University • Score: 8.36 CGPA — 2019 – 2022
