Sunny Sahsi

Full Stack & Systems Engineer

Patna, India • sahsisunny@gmail.com • +91 7759925544 • sunnysahsi.com • LinkedIn • GitHub

Full Stack & Systems Engineer at Fountane specializing in Next.js, Go microservices, and enterprise AI orchestration. Engineered a zero-trust AI orchestrator resolving queries across 600+ microservice endpoints with sub-100ms routing latency and strict tenant isolation.

WORK EXPERIENCE

Fountane Inc.

Aug 2024 — Present

Remote • Full-time

Associate Full Stack Developer

2026 — Present

- Architected a high-concurrency enterprise AI orchestrator in Go routing queries across 600+ microservice endpoints, achieving sub-100ms internal tool dispatch and parallel API execution.
- Enforced zero-trust access by forwarding caller-scoped session tokens and programmatically injecting tenant IDs in Go, preventing prompt-based tenant drift with 99.9% isolation compliance.
- Engineered an autonomous routine runtime for scheduled and event-driven workflows with human-in-the-loop approvals, reducing operational manual inquiry handling by 60%+.
- Delivered production full-stack modules across Next.js 15 and Go microservices, establishing structured UI card schemas with 99.9% uptime.

Junior Full Stack Developer

2024 — 2026

- Engineered responsive enterprise web applications using Next.js and Ant Design, optimizing client rendering performance to cut page load times by 40% on 10,000+ record datasets.
- Built high-throughput Go backend microservices with PostgreSQL and MySQL, enforcing strict transactional consistency (ACID) and robust error handling.
- Shipped payment gateway integrations with automated webhook verification and built dynamic role-based authorization (RBAC) securely gating views and API access.
- Maintained GitLab CI/CD release pipelines and authored comprehensive Vitest unit and integration test suites achieving 85%+ coverage across core business workflows.

Real Dev Squad

Dec 2022 — Nov 2024

Remote • Open source

Open Source Contributor

Dec 2022 — Nov 2024

- Contributed across React, Next.js, and Vue.js codebases within a distributed open-source team.
- Built goal management modal using Vue.js/Vuetify and implemented unauthorized accordion access gating.
- Engineered member status filtering and dynamic user profile components displaying real-time pull request activity.

SmartInternz

Aug 2022 — Sep 2022

Remote • Externship

Android Developer (Externship)

Aug 2022 — Sep 2022

- Built native Android applications in Kotlin implementing Material Design components and responsive UI hierarchy.
- Developed an offline-first Grocery management application with local data persistence and clean MVVM architecture.

TECHNICAL SKILLS

Core Languages:
Go, TypeScript, JavaScript (ESNext), SQL

Frontend Engineering:
Next.js, React, React Native (Expo SDK), React Query, Vite

Backend & Distributed Systems:
Go Microservices & REST APIs, Node.js / Express, Fastify, WebSocket Telemetry

Databases & Storage:
PostgreSQL, MySQL, Redis (Caching & Queues), MongoDB

AI Systems & Agents:
LLM Tool Orchestration, Model Context Protocol (MCP), Zero-Trust Agent Security Gates, RAG & Vector Embeddings

Workflow & Developer Tooling:
Claude, Cursor, Antigravity, Git & GitLab, Jira

EDUCATION

Bachelor of Computer Applications (B.C.A)

2019 — 2022

Patna University • Score: 8.36 CGPA
